## CES Inno On Demand for Retail and Hospitality

Cloud-based head office control for single and multisite retailers

- Stay in control of your business no matter where you are with remote access
- The most accurate business overview at any point in time with real time reporting
- Analyse information with dashboard set up and graph displays
- Maintain centralised control while creating personalised set up for individual outlets

*A cloud based solution enabling you to monitor, control and report on your sales and stock through any browser*

## CES Inno On Demand for Retail and Hospitality

Software as a service solution providing you with up to the minute sales and stock information from anywhere in the world.

### Simple UI - graphical interface

The CES Inno On Demand user interface has been designed to make sure all operations can be carried out as quickly and efficiently as possible. The use of icons, colour coding with the increased functionality of a grid layout and tabbed options ensures the user can easily navigate through the system leaving them free to concentrate on customer service.

### Cloud-based control

Stay in control of your business when not at the point of sale or purchase, with the CES Inno On Demand's software as a service solution. Remote access to your POS management, sales and stock control is available 24 hours a day from anywhere in the world and is compatible with any browser.

### User control

Control access to features and functionality for individual users, or groups of users. Access is easily configurable to create a personalised summary or restrict access to certain screens, adding, deleting or editing various items.

### Reporting

Gain greater visibility over daily transactions and on going business operations through detailed stock reports accessed at any time from anywhere. View sales and stock by branch or as an overview. Reports such as profits and margins, till sales, stock movement, best sellers and current stock can be set up and distributed, providing you and relevant staff with the tools to run your business as efficiently as possible.

### Simple till maintenance

Quickly set up your till layouts with a functional screen design that works best for your business. Easily maintain and update each user interface, add buttons for new products, operators and promotions. Inno On Demand gives you the flexibility to apply changes to all sales outlets for speed and accuracy or select individual till points of your choice with varying products or promotions so each point of sale has only the functions required for their operation.

### Advanced search functionality

Save time with the CES Inno On Demand's enhanced search functionality. Filter products and check stock quickly by searching for products by name, part name, barcode or category and directly change properties. Staff can proficiently deal with stock and customer product enquiries.

### Branch and Location Control

Many of CES Inno On Demand's powerful tools can be applied by branch or location. This allows you to treat each branch as an individual providing the control and set up best for each outfit while creating the best solution for your business as a whole.

### User alerts and notifications

Keep staff informed of promotions, opportunities to upsell and general news by sending messages and alerts to each point of sale. Keep up to date with all the latest CES Software developments and updates with our notifications sent through the system.

### Stock location search

Staff can maximise selling opportunity and utilise the stock by finding products available from alternative locations, reserving items or arranging transfer of stock. Choose your location and product and an electronic map will display all locations and stock values against that product. Allowing you to stock in multiple locations, with varying minimum and maximum stocking levels.

### Multiple selling prices

Create individual price points for different locations together with offers and promotions. Varying prices to reflect the location including the best and worst sellers at each outlet enables you to streamline your overall stock levels as well as makes the best use of what is being held at each location.

### Easy sales monitoring

The new sales monitoring dashboard creates an overview of your business transactions with easy access to detailed views of sales data. Process information quickly with graphs of sales by branch, date or department.

Easily access data with our applications for android devices.

Produce stock takes feeding information back to Inno On Demand and view stock value with the Inno Stock Counts App, real-time head office reports with the Inno Reports Dashboard App and view Consolis X-10 sales analysis with its very own app.

### Real Time Information

Improve business efficiency with immediate access to real time reports on sales, stock and product information. Gain more control by accessing an up to the minute overview of your business allowing you to introduce better processes, improve stock control and therefore reduce costs.

### Flexible movement operations

CES Inno On Demand provides flexibility to create purchase orders or stock transfers and track progress or receive deliveries, book in and adjust stock immediately. Simple stock maintenance, creating stock counts and adjustments ensures you have the full picture of your stock levels at all times allowing you to order efficiently and make the best use of your cash flow.

### Till communications

Inno On Demand connects with CES InnoPOS and the Consolis X-10 to push sales data back to head office within seconds of a completed transaction. InnoPOS can be used in conjunction with CES InnoCentral to provide the perfect fit for different job roles from head office staff based in one location to branch managers on the move.

### About CES Software

CES Software launched its groundbreaking CES Touch Screen EPOS software in 1997 and has since grown to become a market leader in the provision of powerful, affordable and user-friendly point of sale applications. Over this time a worldwide customer base has been built covering pubs, clubs, hotels, restaurants, CTNs, amongst others.

CES is owned by Consolis Systems Limited; a software and services company which focuses on the retail, mobile telecoms and digital services markets. It builds on established retail management software products, and uses its senior management team's experience of these industries to launch innovative new services into retail customers.
